

Environment Policy

Introduction

Aurecon is committed to managing and mitigating the environmental impact of our own activities while empowering clients to address their environmental challenges, protecting the ecosystems and communities we collectively serve.

Purpose

The purpose of this policy is to outline Aurecon's commitment to the environment.

Scope

This policy applies to all Aurecon team members including directors, officers, employees, and contractors and all Aurecon businesses regardless of location or market.

Roles & Responsibilities

All staff are responsible for the implementation of this policy. The Group Director, Health & Safety shall establish and maintain an Environmental Management System to enable Aurecon to deliver on our commitments.

Further Assistance

Contact a member of the Health, Safety and Environment Team for assistance with this policy.

Principles & Commitments

Aurecon is committed to:

- Taking direct action to reduce emissions, prevent pollution and minimise waste across our business and the solutions we deliver
- Embedding environmental objectives and targets throughout our strategy, business and culture
- Clearly defining and communicating environmental expectations to all team members
- Proactively identifying, assessing, and mitigating environmental risks associated with both our internal activities and the solutions we provide
- Empowering our people to make environmentally conscious decisions through information, training and coaching
- Continually improving our Environmental Management System to enhance environmental protection
- Complying with applicable client, regulatory and industry requirements.
